

## **MORAL VALUE, ETHICS AND INDIAN POLITICS**

**DJAMEL**

I'm Right, You're Wrong! No, You're Wrong, I'm Right! Is the new book by Ricardo Planas, a senior political analyst educated at the George Washington University? The book is an exploration of current campaign issues from a fresh moral values principles perspective, on ethics and political correctness, with the idea that the political world is in need of a new set of leaders, leaders who cut across the ideological spectrum and across partisan lines to represent Americans with a respect for the innate dignity of all human beings, with ethics and moral values. Many issues are discussed in the book's chapters, available for free download from ReasonandPolitics.com, including the pro-gun control position.
